

I am the UI designer of this project so that almost all the HTML and css files so far are written by me. Jee helped me implement my code into php files but basically, most of html/css codes are written by me.

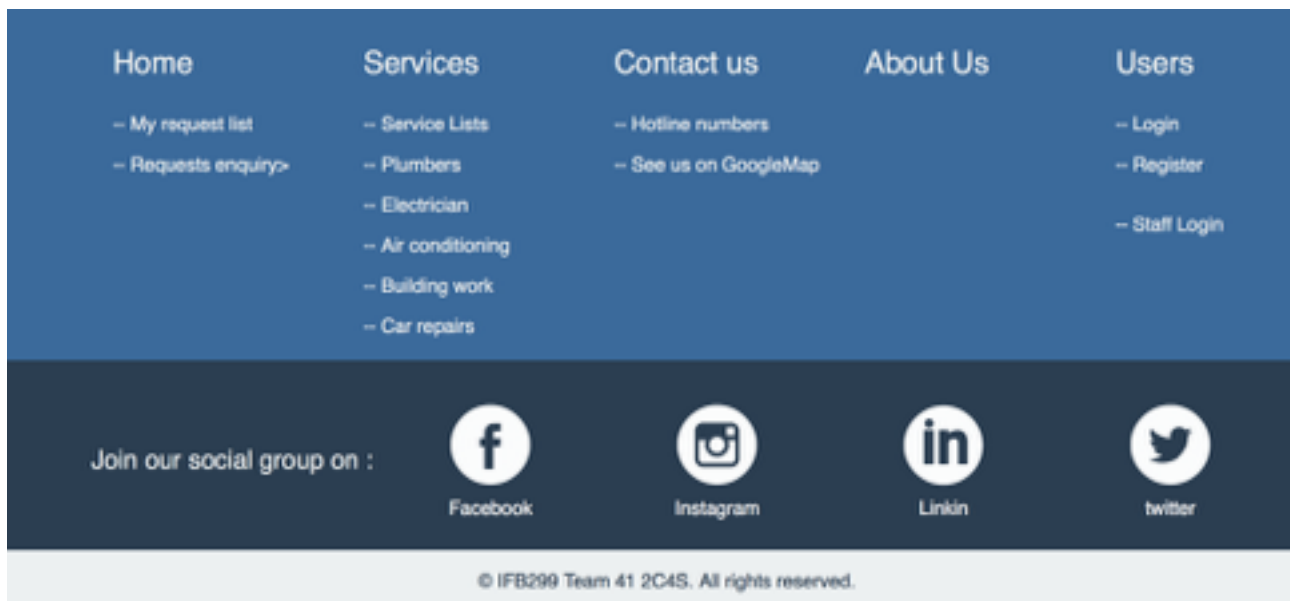

1. Designing work

My initiate work is design the UI and this is part of my work:

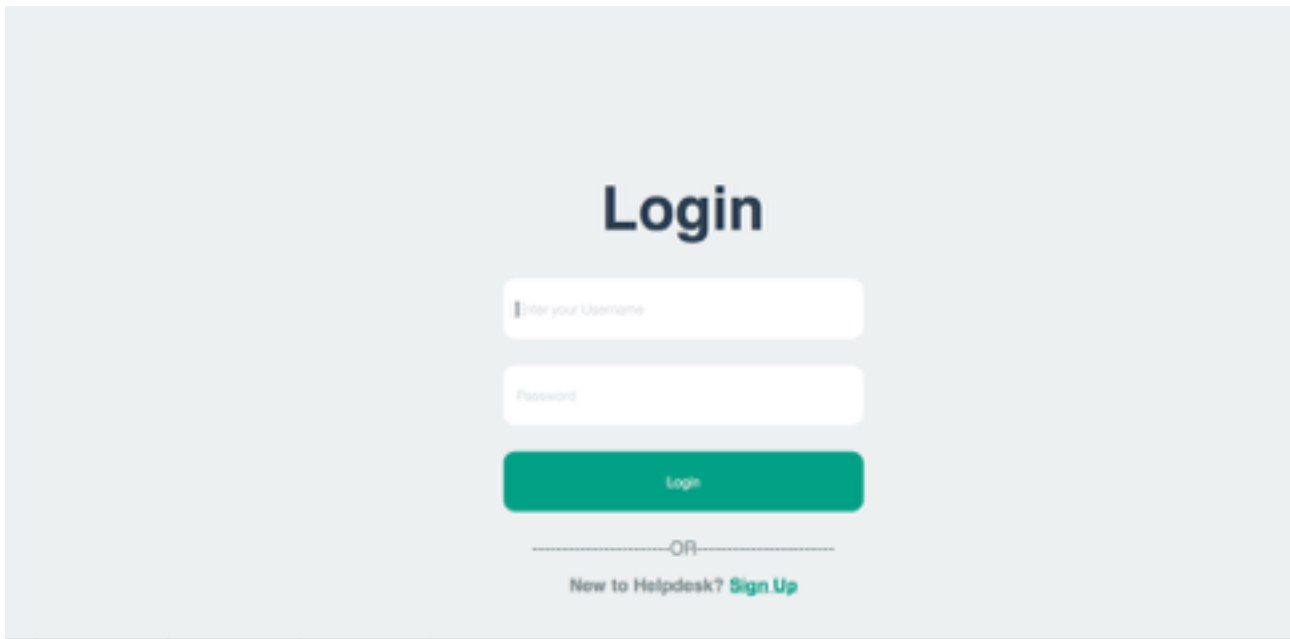

navi bar:

footer

Login page:

and files in “Home page HTML” used to be my picture version of my design. Usually I will use Photoshop to draw pictures before writing codes.

2. Coding parts:

All files in
root/ Login System/ Login System V1.0

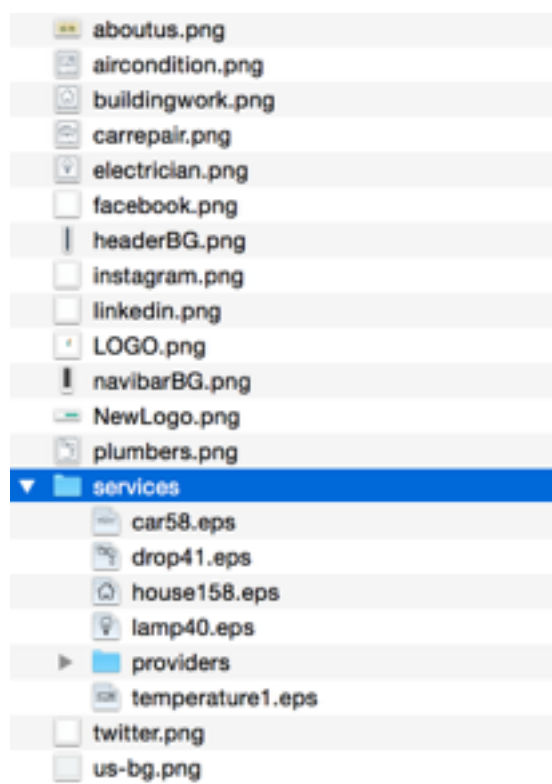

are part of my contribution. including pictures

	test.php	PHP
	StaffSignUp.php	PHP
	Stafflogin.php	PHP
	StaffHome.php	PHP
	StaffAccount.php	PHP
	SignUp.php	PHP
	Services.php	PHP
	plumbers.php	PHP
	Masterpages.php	PHP
	Logout.php	PHP
	Login.php	PHP
	Logged.php	PHP
	Home.php	PHP
	footerBar.php	PHP
	db_const.php	PHP
	ContactUs.php	PHP
	account.php	PHP
	AboutUs.php	PHP

and the css file:

	style.css
---	-----------

and the picture files:

the logo of our website also is designed by me:

and as a result I am the only person who holds the psd photoshop files of this pictures.

3. User stories

a. I contributed in creating user stories, as I am also a Information system students so I have done what IS student should do, but most of user stories are done by Jessie and Spenser, I help complete them and evaluate them, and after few times discussion we work out it.

b. I helped input user stories into Jira. half of user stories in Jira is done by me. In Jira, every story can show the uploader

4. sprint plan

In week 4 we discussed about sprint plan, I contributed by analyzing the capability of our team so that we can split work correctly and we can make sure all work in sprint 1 & 2 is necessary and reasonable.

5. communication

As front end is basic of our project, I keep in contact with Alex and Jee and we helped each other in implement the codes, modifying codes, solving problems.
